PROJECTS

Jimmerosity — [Link](#) (In Production)

Used technologies: **Gatsby, GraphQL, Ghost, Figma, Chakra-Ui**

Jimmerosity is an anti-bullying platform developed by the Fredette Family Foundation. Its goal is to promote anti-bullying techniques to teachers and students.

Prototypes Link: [Site](#) and [Dashboard](#)

Toy Robot — [Link](#)

Used technologies: **React, Typescript**

Robot Challenge is a refactor project on a failed coding challenge. The original code worked but failed to be clean and effective so we decided to make the best possible version of the Robot challenge.

Broke up logic out into smaller, easily testable functions/components.

Effectively make a Typescript interface to handle our Robot information in an object and add comments for others that view this code.

Slacker App — [Link](#)

Used technologies: **Figma, React, Firebase, Material-Ui, Context API**

Prototyped with the intention of it being a realtime chat app with github or email login.

Made small testable functions/components, implemented Cloud Firestore and Firebase Authentication.

Effectively passed state through Context API and styled with Material-Ui.

Some of the issues were the problems I found when learning a noSQL style database. I had no previous experience with Firebase/Firestore but found it really effective and fun for our project.

SKILLS

JavaScript, React, Typescript, Gatsby, Python, HTML/CSS,

VSCode, Git, Firebase, Node.js, Material-UI, Figma, Semantic-UI

Trello

Bilingual, Spanish/English

EDUCATION

Iowa State University, Dec 2013 Bachelors in Finance and Spanish

Lambda Coding BootCamp, Dec 2020 Full Stack Web Program

EXPERIENCE

Preply, Remote - *Javascript Tutor*

Dec 2020 - PRESENT

- Providing one-on-one guidance to students on Javascript, React, HTML/CSS.
- Create learning plans, course work assignments, help with projects and homework assignments.
- Work with students from all over the world with different needs and learning styles.

Fisher Investments, Camas, WA — *Client Account Coordinator*

Jan 2018 - Jun 2019

- Coordinated in building relationships with new high net worth clients.
- Maintained and updated CRM web software to work simultaneously with multiple teams throughout the USA.
